**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-11 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach, disclose, or suggest, either alone or in combination a rotating electrical machine comprising an armature having a circular core of a magnetic material and a plurality of magnetic pole teeth extending radially from the circular core for cooperation with a plurality of circumferentially spaced permanent magnets, an insulator having channel shaped portions covering at least in part the cores of the magnetic pole teeth, the channel shaped portions being comprised of radially extending slot portions extending along the sides of the pole teeth facing the slots and integrally joined by an axial portion extending across an axial outermost side of the pole teeth, the axial portion of the insulator channel shaped portions having a thickness greater than that of the side portions to avoid thinning at the juncture therebetween, coil windings wound around the cores of the magnetic pole teeth with the insulator being interposed therebetween.. Therefore, the limitations contained on claims 1-11 are considered to be in condition of allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
